

2011 FISH ORDER

Place orders by May 9th, 2011.

Pick up

*Wednesday, May 11th
behind the District Office
107 Park Street-Farmington.*

*You must have a permit when ordering & the permit must be with you to pick up the fish.
To obtain an application for a trout permit from Augusta send a business size, self addressed, stamped envelope to the address above or
pick one up at the Soil & Water Conservation District office in Farmington. You must have your permit before you order fish.*

Trout from Mt. Spring Trout Farm will be packaged on site
MINIMUM ORDER: 34 fish

sizes available	# Brook Trout	before 3/31	after 3/31	Sub total	\$5/oxygen bag & box	Fish feed or Clear Pond	totals
5 - 6" 1 bag/50 fish		\$2.00 each	\$2.25 each				
6 - 7" 1 bag/33 fish		\$2.40 each	\$2.70 each				
	# Rainbow Trout						
5 - 6" 1 bag/50 fish		\$2.00 each	\$2.25 each				
6 - 7" 1 bag/33 fish		\$2.40 each	\$2.70 each				
\$57/gal Clear Pond: a water quality product that controls algae. It is a live bacteria liquid that "feeds" on the excess nutrients in your trout pond reducing phosphorus levels and the chance for algal bloom. 1 gallon treats a 1 acre pond.							
\$44/44# bag fresh "floating trout food" You should only feed your fish small amounts at a time (<i>do not feed until they are full</i>) so the food does not go to the bottom and add to the nutrient loading.							
total enclosed!							

Make checks payable to: Franklin County SWCD, 107 Park Street, Farmington, ME 04938

Pond Surface Size	5-6" & larger
1/4 acre	50
1/2 acre	100
1 acre	150 - 250

STOCKING GUIDE

The number of fish a pond can support depends on many factors including water temperature, available food, flow of water through the pond, depth and surface area. Surface area is the best factor to use as an estimate.
