

Do You Have A GPS Sitting Around?

Learn how to use your unit through our GPS Training

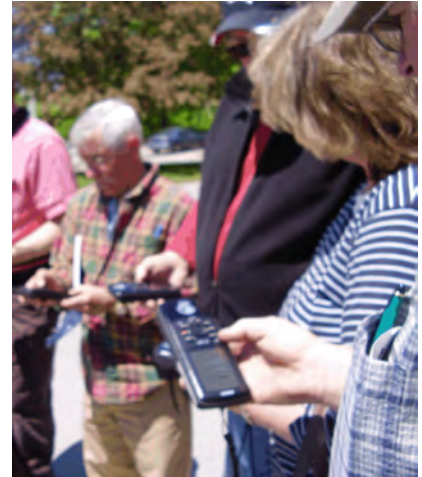

***On Tuesday, August 17, 2010
8 am–12 noon***

at the USDA Service Center on Park St in Farmington

Did you know that it takes about 20 minutes for your Global Positioning System (GPS) unit to correct to your actual location when it is first turned on? Or that a way-point is the reading you told the GPS unit to memorize? You will learn what longitude and latitude are, along with many more useful pieces of information at this training session.

The GPS units that will be used are Garmins. The session is limited to 25 on a pre-paid, first come first serve basis. This class will teach you to expand your GPS skills and avoid expensive, time consuming and risky mistakes. *Students will get some hands-on field instruction outside.*

Must Pre-register

by sending a check for \$15 with registration form

Make check payable to:

Franklin County SWCD, 107 Park St., Farmington, 04938

Do you own a hand held GPS unit? have a GPS in your vehicle need handicapped accessibility?
